EDUCATION

Harvard University, Extension School, Cambridge, Massachusetts December 2027
Master of Liberal Arts in Systems Engineering | GPA: 3.89

Boston University, College of Arts and Sciences, Boston, Massachusetts December 2024
Bachelor of Arts in Computer Science, Minor in Business Administration and Management

WORK EXPERIENCE

Beacon Bank, Remote June 2025 - Present
Full Stack Developer

- Engineer secure, reliable enterprise-grade software for financial services using Java, .NET, RESTful APIs, and Microsoft Azure, following Agile Scrum practices to support scalable applications and internal banking operations.
- Design, scale, and maintain secure data pipelines using SQL and Snowflake, while developing analytics applications and dashboards in Power BI and Excel to support business intelligence and operational decision-making.

Harvard University, Hybrid March 2026 - Present
Faculty Research Aide W. Professor Jill Slye

- Engineered and deployed a Google Looker research analytics platform with 5+ dashboards, enabling scalable data exploration, trend analysis, and stakeholder-facing reporting.
- Conducted statistical analysis using Python, Pandas, and Matplotlib to identify important research findings, then authored research materials communicating the methodology and results to technical and non-technical audiences.

Amica Mutual Insurance, Lincoln, Rhode Island January 2025 - May 2025
Technical Analyst

- Automated extraction of underwriting data for 25,000+ insurance accounts for 10+ unique fields each via a multithreaded Python Selenium bot, replacing manual processes and enabling timely insights for business intelligence.
- Produced comprehensive Python data science reports by merging and feature engineering from internal datasets to support company initiatives, including underwriting analysis, policy tracking, and sales performance.

Boston University, Boston, Massachusetts September 2024 - December 2024
CS411: Software Engineering Teaching Assistant

- Guide and manage students in groups of 4 with full-stack software engineering project requiring 2+ RESTful APIs, MongoDB, XML, or MySQL databases, proper Docker containerization and Kubernetes orchestration, integration with Google data analytics where applicable, completed in an agile / scrum environment using Jira.
- Assist with creation of comprehensive unit testing / smoke testing, proper exception handling, extensive information security, complete documentation, and architecting model-view-controller (MVC) software design patterns.

PTC Onshape, Boston, Massachusetts June 2024 - August 2024
Data Systems Engineering Intern

- Developed a robust program for large-scale de-duplication of educational accounts in company's Salesforce instance, achieving ~95% accuracy and processing 80,000+ accounts.
- Scraped 25,000+ data points from Google Maps autonomously through developed Python web scraping script for the field population of over 4000+ strategic academic institutional accounts.
- Designed customizable Google Looker looks and dashboards to support the company's educational outreach initiatives.

PROJECTS

Modern Data: From Ingestion to Production January 2025 – January 2026

- Authored and published Modern Data, a technical guide to production-grade data engineering systems; distributed globally via Amazon, Apple Books, and Barnes & Noble (eBook, Paperback, Hardcover).

SKILLS AND PROFESSIONAL MEMBERSHIPS

Skills: Python, Azure, Snowflake, AWS, Git, Looker, Salesforce, Excel, Docker, Go, C, Java, Kotlin, Power BI, Kubernetes
Professional Memberships: BU ENG Alumni Mentoring, Terrier F1rst Alumni Mentoring, ACM, IEEE, IETF
